github.com/lunagrove

Experienced software developer, with extensive knowledge of ERP systems, recently up-skilled to include full-stack web development. In-depth knowledge of relational databases, database design and SQL programming, strong C# and ASP.NET skills. Passionate about producing high-quality, well-documented code and providing user experiences that are both appealing and intuitive. One of the top ranked students in the BCIT SSD class of 2022-2023.

TECHNICAL EXPERIENCE

PickAndGo

Jan - Apr 2023

BCIT – SSD Program Internal Project

Vancouver, BC

Collaborated with four fellow students to develop a fully responsive web application for a restaurant offering customization of sandwiches, including “favourites” functionality for easy reordering, with confirmation emails and payment through Paypal.

- Developed with ASP.NET Identity Framework in C#
- Designed and implemented a Microsoft SQL Server database

Tee Time Event Management App

May 2023

BCIT – SSD Program Industry Project

Vancouver, BC

Collaborated with three fellow students to develop a full-stack mobile application for Android and iOS. Written with React Native, using AWS API Gateway, lambda functions, Cognito and Amplify.

- Allow hosts to create events and record attendance
- Allow users to register and waitlist for events
- Comprehensive host reporting on events

WORK EXPERIENCE

Atlas World Class

Apr 2004 – Dec 2013

Software Developer

Auckland, NZ

Developed Atlas World Class, a Windows-based ERP solution, written using Borland Delphi (Object Pascal) and Interbase RDBMS (SQL).

- Implemented and maintained the software for NZ clients
- Provided customer support, troubleshooting problems, developing solutions and writing custom modifications.

Martin Spencer & Associates

Jan 1984 – May 1988

Software Developer

Auckland, NZ

Member of the development team for creating and maintaining the New Zealand version of BPCS, modifying the standard code to better suit the unique manufacturing requirements of NZ businesses.
